

tegnosis

Patent Tool.

Tegnosis 3.0 – your web based tool for tailored-made patent informations

Search

Access to more than 100 million patent documents worldwide

Analyse patent claims and description directly on your computer screen without the necessity to print out the corresponding drawings.

Monitor

Technology- and Competitor monitoring: Find new patents arising from saved searches.

Patent family: be informed about follow-up filings and patents getting granted.

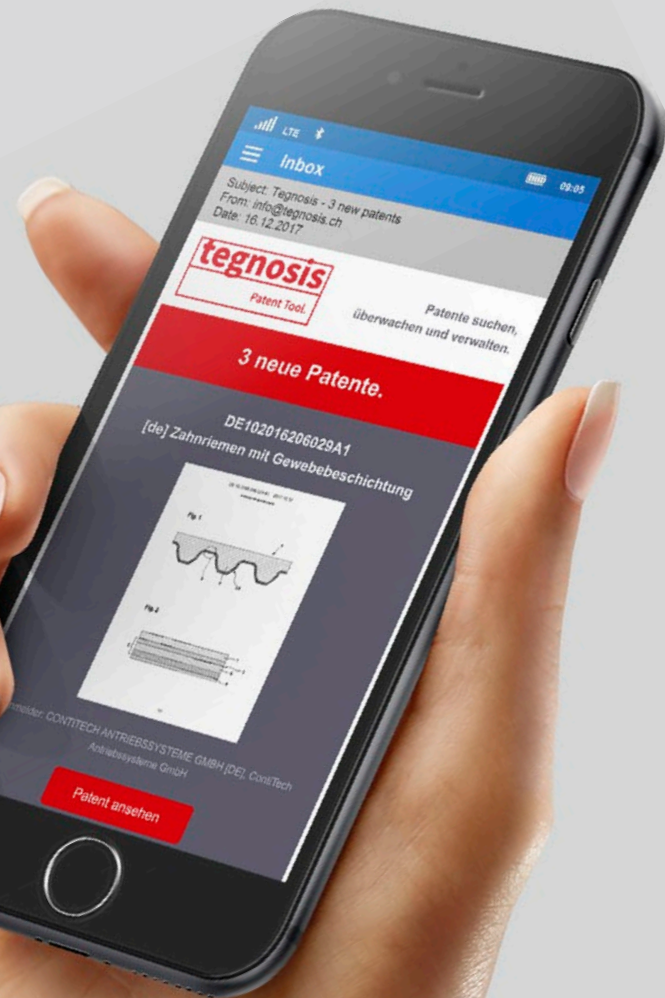

Legal status: new Legal Events will be shown and tracked automatically (Inpadoc).

Citations: Find recent patent publications, which point in their examination process to your patents of interest.

tegnosis

Patent Tool.

Share

Access shared patent folders.

Set-up complex search profiles for users who are less skilled in patent search techniques.

Rate patents according to commonly determined rules.

Incorporate external experts into the user group (i. e. patent attorneys).

Inform someone about an interesting patent.

Be informed when other users comment a patent.

Tegnosis is suitable for

Development Teams and Product/Key-Account-Managers of technology companies

Business- and Innovation-Parks providing Tegnosis as a service for start-ups

Technology Transfer Offices

Try it free of charge

Ask for a demo and a free fully functional 10 days-trial-period.

Fixed price

The annual license fee is independent from the number of users within a business unit and independent from the intensity of the system usage.
